Dear Patent Business Customer:

The United States Patent and Trademark Office (USPTO) has begun testing the use of image technology to replace paper processing of patent applications. You have the opportunity to be involved with a historic prototype that is testing this electronic processing of patent applications within three art units (1634, 2827 and 2834) and the Office of Initial Patent Examination (OIPE).

What will be tested during the prototype?

In the prototype, the paper document contents of pending applications assigned to the three participating art units will be scanned into electronic image files. All processing and examination will be performed with the resulting electronic files during the prototype.

How will applicants be affected?

The attached information sheet details two process changes:

- Amendments should be submitted in a special format. Specifically, a new complete claim set with changes marked in strikeouts and underlining should be submitted. No clean copy of the amended claims is necessary. Please see the OG Notice of 12/17/02 (<http://www.uspto.gov/web/offices/com/sol/og/2002/week51/patimag.htm>.)
- US patent and US published application references will not be mailed with Office actions. These references are available free of charge on our website.
- Applicants are requested to use eIDS for submission of any IDS. For assistance with eIDS, you may contact the Patent Electronic Business Center (toll free at (866) 217-9197).

What are the official files?

During the prototype, the Office will maintain in a central location the original papers that constitute the official file. Over the next few months, the Office will be taking steps to have the electronic file deemed the official file.

How long will the prototype last?

It is expected that the prototype program will incrementally migrate into a production system, with the goal of eliminating paper patent applications files by early summer.

Want more information or to provide feedback?

Through your participation, USPTO will have an opportunity to test the electronic processing of patent applications and meet its goal of delivering high quality products through implementation of electronic patent processing by the end of 2004. Thank you for your support for this exciting activity and for helping the USPTO achieve its goal of providing better service through e-Government.

Sincerely,

Nicholas P. Godici
Commissioner for Patents

NOTIFICATION OF REQUESTED NEW FORMAT FOR AMENDMENTS AND/OR RESPONSES FILED IN ART UNITS 1634, 2827, AND 2834

The United States Patent and Trademark Office (USPTO) is currently conducting a prototype of electronic application processing and examination in **Art Units 1634, 2827, and 2834**. To facilitate the prototype, the following changes in format for Amendments and/or Responses filed in those Art Units are requested.

Requested Format of Amendments and Responses during the prototype.

Each section of an Amendment and/or Response (e.g., Claim Amendments, Specification Amendments, Remarks) should begin on a separate sheet to facilitate separate indexing and scanning of the document. *For example*, in an Amendment containing a.) introductory comments, b.) amendments to the claims, c.) amendments to the specification, and d.) remarks, each of these sections should begin on a separate sheet. **For each amendment filed in Art Units 1634, 2827, and 2834, the requirement to provide two sets of claims (a clean version and a marked up version), as set forth in 37 CFR 1.121(c), will be waived where the following format is employed.**

Each amendment that includes a change to an existing claim, or submission of a new claim shall be made by submitting a **summary document with the status of all claims and the text of all pending claims as follows:**

- (1) The status of all of the claims in the application, including any previously canceled or withdrawn claims, must be summarized in each amendment document. Status is indicated by a parenthetical expression following the claim number (e.g. (original), (currently amended), (previously amended), (canceled), (withdrawn), or (new)). The text of all pending claims must be submitted each time any claim is amended. Canceled and withdrawn claims may be indicated by only the claim number and status.
- (2) All claims being currently amended must be submitted with markings to indicate the changes that have been made. The changes in any amended claim may be shown by strikethrough (for deleted matter) or underlining (for added matter), or by any equivalent marking system.
- (3) The text of pending claims not being amended must be presented in each amendment document in clean version, i.e., without any markings. Any claim presented in clean version will constitute an assertion that it has not been changed relative to the immediate prior version.
- (4) A claim may be canceled by merely providing an instruction to cancel. Any claims added by amendment must be indicated as (new).
- (5) All of the claims in each amendment paper must be presented in ascending numerical order. Consecutive canceled or withdrawn claims may be aggregated into one statement (e.g. Claims 1 – 5 (canceled)).

Amendments to the specification are performed in the conventional manner (37 CFR 1.121(b)).

Patent Copies

Additionally, applicants and practitioners will no longer be required to provide copies of U.S. Patents and Published U.S. Patent Applications cited in any Information Disclosure Statement (IDS) submitted to the USPTO during the prototype and in applications assigned to the three art units. It is requested that eIDSs be used to file all IDS papers for applications before the prototype Art Units. Similarly, during the prototype, copies of U.S. Patents and Published U.S. Patent Applications cited by an examiner during prosecution of an application will not be provided to applicants in Office actions from these Art Units. These documents are available from the USPTO web site, www.uspto.gov for free download. Cited foreign patents and published applications and non-patent literature will be mailed by conventional processing.

The above requested new format and procedures are applicable during the prototype only to applications assigned to Art Units 1634, 2827, and 2834. Any questions regarding these requirements may be directed to image.processing@uspto.gov or one of the Supervisory Patent Examiners of these Art Units 1634 – Gary.Jones@uspto.gov; 2827 – Dave.Talbott@uspto.gov or 2834 – Nestor.Ramirez@uspto.gov.

Example:

Claims 1-5 (canceled) (Note: consecutive canceled or withdrawn claims may be aggregated)

Claim 6 (withdrawn)

Claim 7 (previously amended): A bucket with a handle.

Claim 8 (currently amended): A bucket with a ~~green~~ blue handle.

Claim 9 (withdrawn)

Claim 10 (original): A bucket with a wooden handle.

Claim 11: (new): A bucket with plastic sides and bottom.
